Portfolio

Personal Website - React + Bootstrap powered front end site. A compilation of various skills learned to demonstrate Statement and Prop management.

Mary's BBQ - React + Bootstrap powered front end website. Application features a restaurant menu, cart, and ability to order.

Fullstack Authentication - React + Sequelize powered web application that serves as the frame for a website. Featuring custom React Hooks to manage authorization for protected URL.

AppThis - React + ExpressJS powered full stack application that can send text messages to cellphones using Twilio. Frontend framework is handled by Grommet combined with ExpressJS to retrieve and update information to the database.

Project Sidelined - Dynamic React powered full stack application partnered with ExpressJS for the backend. React and Redux are used to handle various stateful components and vital information. Express and RESTFUL API store the save state of user content.

Piano Connection - React + Grommet powered front end website for private piano company. Website to be used for information, discoverability, and online presence.
